PROJECTS

Customer Laptop Preference Analytics

2025

Tools: Excel, Power BI

Conducted PC market survey analytics to identify customer preferences across 10 major laptop brands. Cleaned, modelled, and visualized survey data in Excel and Power BI, revealing trends in performance, affordability, design priorities, buying behavior, and pricing sensitivity.

Hewwelt Data Job Research

2024

Tools: SQL, Power BI

Processed and validated 50,000+ recruitment data entries using SQL, then designed interactive Power BI dashboards for hiring metrics and recruitment trends. The work improved HR reporting efficiency by 25% and produced strategic recommendations for recruitment optimization.

Digprom Analytics

2023

Tools: SQL, Power BI

Cleaned and transformed over 100,000 customer records with SQL and Power BI, improving model readiness by 35%. Designed automated ETL data pipelines for churn prediction, reducing manual processing time by 40% and supporting data-driven retention strategies.

Kwara Tech for Youths' Initiative

2022

Tools: Excel, Power BI

Collaborated with a state technology office to deliver data-driven youth empowerment programs, training 200+ participants in Excel and Power BI. Led analysis on training performance metrics and created dashboards for government reporting and stakeholder presentations.

Kid Tech Coding Program

2021

Tools: Excel, Power BI

Developed analytics modules for children aged 8-15, simplifying concepts like data storytelling and Power BI dashboards. Evaluated participant performance data to improve teaching content and increase learner engagement by 45%.
